## Introduction to XAMPP

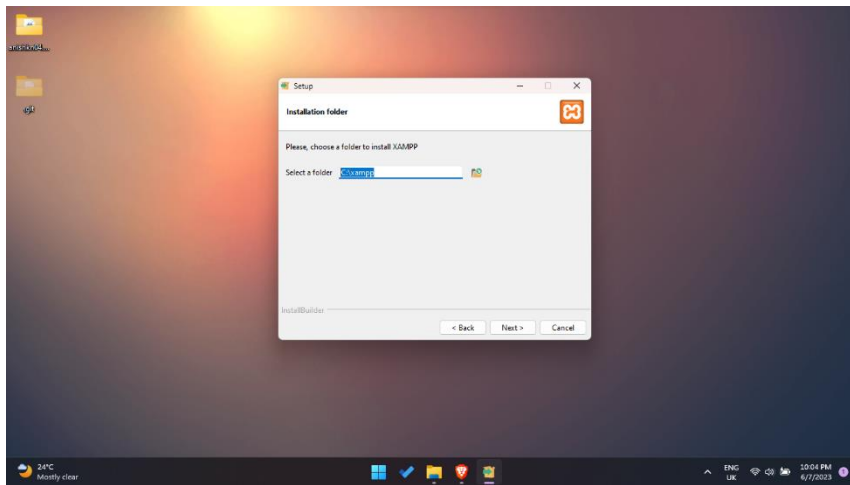

XAMPP is a free and open-source software where X stands for Cross-Platform, A stands for Apache, M stands for MySQL, and the Ps stand for PHP and Perl, respectively.

## Installing XAMPP

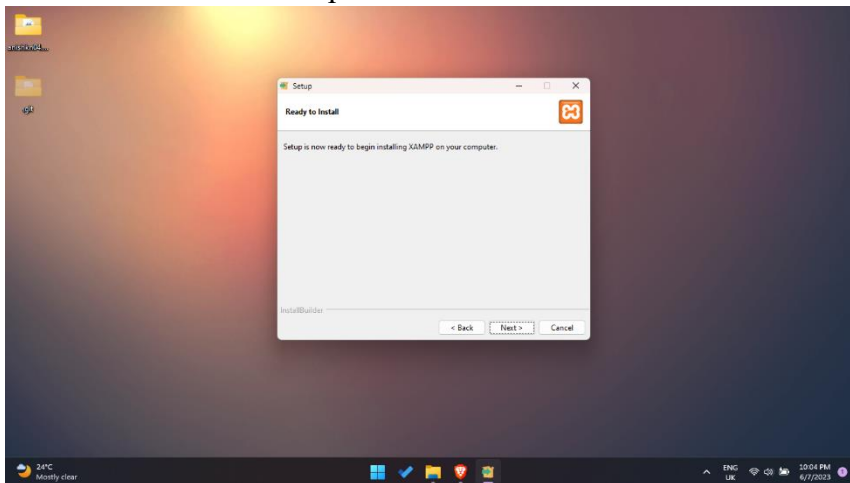

1. Go to <https://www.apachefriends.org/> and download the appropriate installation file.
2. Execute the setup program and start installing.
3. Press “Next”, twice.

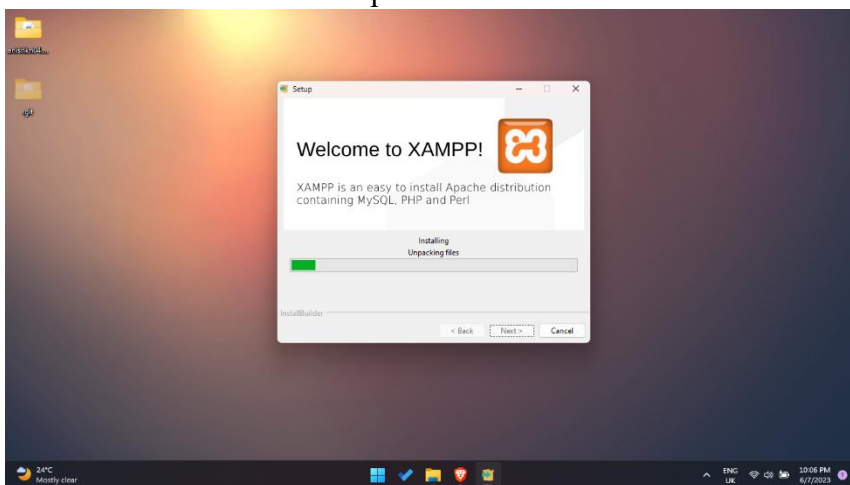

4. Select the install path and press “Next”.

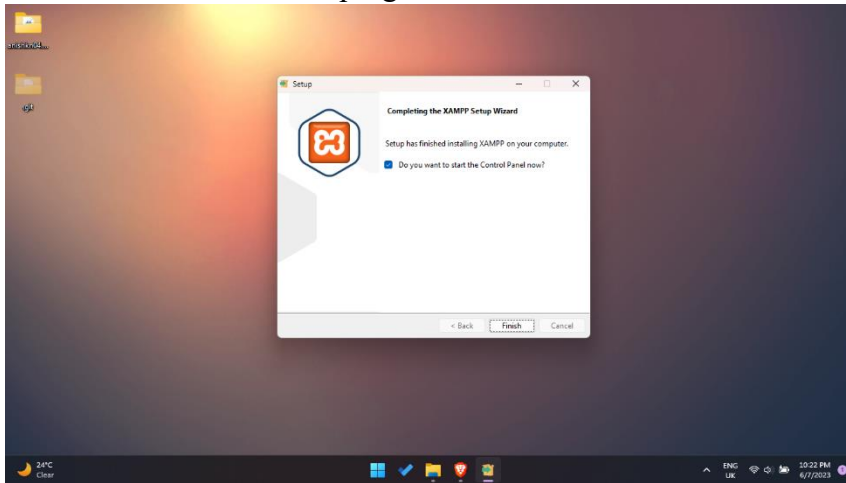

5. Click “Next” to start setup.

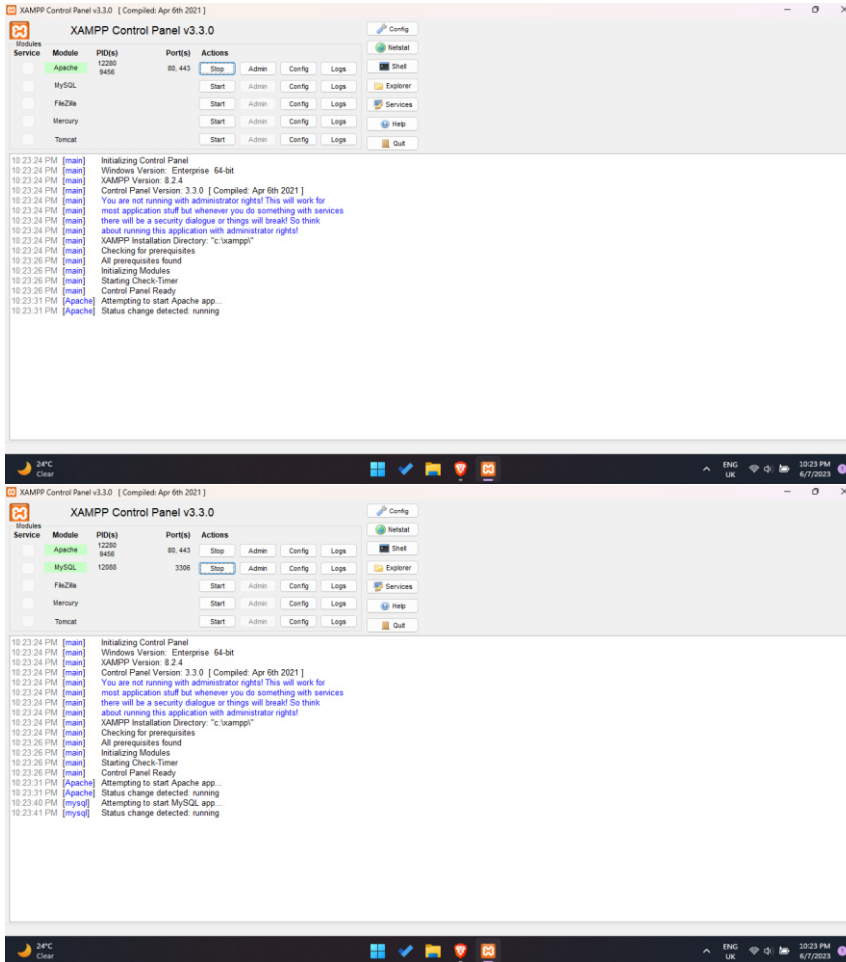

6. Wait till the installation completes.

- Click “Finish” and let the program start Control Panel.

- Start “Apache” and “MySQL”

9. Click “Admin” action of MySQL Module to start “phpMyAdmin” in your default browser.
